

## Company

Licreston Asset Management focused on palladium investments mostly through physically allocated bullions.

The Fund, managed by the Licreston Asset Management seeks to provide a convenient investment alternative for investors interested in holding physical precious bullion by providing direct exposure to the global precious spot price.

### Investment objectives

- Achieve long term sustainable return on the investment capital
- Provide diversification for investors from classic assets classes
- Secure direct exposure to palladium physical market
- Limit investments risks through a full backup of palladium bullions
- Benefit from the market volatility to extract additional cash revenue to investors
- Generate positive regular income flows through dividend distribution
